

Purissima Hills Water District

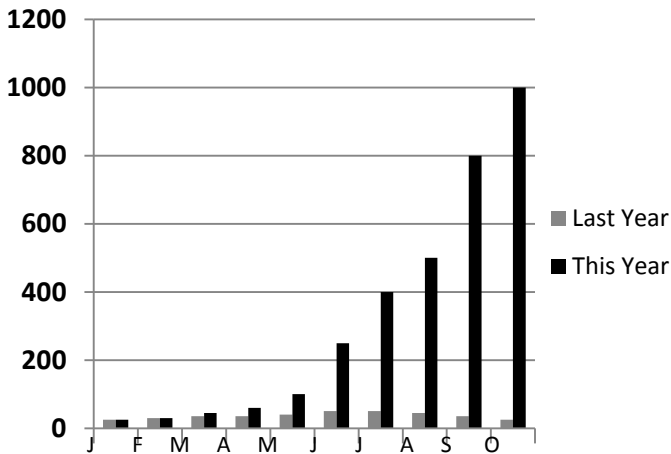

## Feature:

Your water bill now includes a graph of your monthly water use in units (cubic feet) for the last two years. A typical graph might look like the one below. It shows that water use increases in the summer months, probably due to increased irrigation. It also shows that the homeowner is using more water every month compared with last year.

Notice on this graph, the units are shown in 10s. This monthly usage is considered moderate.

Your graph may look like the one below, which appears to be low use until it gradually soars to 1000 units. *You have a leak getting worse!*

Purissima Hills Water District Tel: 650-948-1217

## Notices

### Election Results November 6, 2012 General Election

Elected to the District Board of Directors:

- Ernest Solomon**
- Brian Holtz**
- Steve Jordan , President**
- Seated Directors are:
- Robert N. Anderson**
- Gary Kremen, Vice President**

Find out more about all of the Board Members at [www.purissimawater.org](http://www.purissimawater.org)

Purissima Pipeline

## Conservation Tips

### Freezing Pipes

surprise homeowners in Los Altos Hills every winter. Exposed galvanized and PVC pipe running along the outside of your house may crack when the night temperatures dip to freezing. Take some precaution and wrap those pipes with a pipe sleeve available from the local hardware store, or extra towels and sheets. If the pipe has already frozen - water won't flow from a tap - wrap it with an electric heating pad or warm towels, or use a hair dryer until sufficient water trickles through. This treatment may help prevent cracking.

1 unit (cubic foot) = 7.48 gallons
