

PURISSIMA PIPELINE

Have You Checked Your Irrigation Lately?

A leak could be the cause of an unusually high water bill. You can help lower your bill and save water by making sure your irrigation system is functioning properly. Consult with your landscaper or contact Alexis Shields, the District's Water Conservation Specialist, at 650/948-1217, or by email at ashields@purissimawater.org for assistance.

Free Water-Wise House Calls

The Water-Wise House Call program is offered to all residences in Santa Clara County and benefits all Los Altos Hills customers. A Water-Wise House Call is a free home water use survey that helps identify opportunities where you can conserve water inside and outside the home. This invaluable tool provides you with knowledge of your water use outside of your monthly water bill by teaching you how to read your meter, calculate water use, and survey your irrigation system.

A Water-Wise House Call Includes:

- Replacing leaking toilet flapper valves, if needed and requested.
- Measuring your showerhead flow rates and installing free showerheads, if needed and requested.
- Measuring faucet flow rates and providing faucet aerators for kitchens and bathrooms.
- Evaluating the efficiency of your irrigation system.
- Providing you with a personalized irrigation schedule.
- Identifying irrigation leaks, broken or mismatched sprinkler heads, high water pressure, and other common problems.
- Developing a prioritized list of how you can start using water as efficiently as possible to help meet the 10% water savings goal.

What are the benefits of a Water-Wise House Call?

In addition to possibly lowering your bill, you will have the satisfaction of knowing you are using a precious resource efficiently. The Water-Wise House Call is also the preliminary inspection needed for the Landscape Rebate and the Irrigation Hardware Rebate and is good for three years.

How do I sign up?

Water-Wise House Calls are available to Santa Clara County residents Monday through Saturday during daylight hours. To schedule an appointment, call 800/548-1882.

Maintenance Around The Meters

Please maintain the landscape around your meter. Shrubs and trees may cover the meter, making it difficult for us to read or check your meter for leaks.
