

Purissima Hills Water District Wants to Pay You to Conserve Water!

The Purissima Hills Water District is committed to assisting its customers to conserve water in many different ways. Although we may be facing a wet winter this year, conservation in California is always ongoing.

For 2010, the Purissima Hills Water District has created a conservation program designed to meet the specific needs of our customers by providing limited funding to help customers implement selected water conservation projects.

To qualify for funding, we invite our customers to submit a proposal for home irrigation and landscape projects that will reduce annual water usage. The District will evaluate all proposals to determine which projects conserve the largest amount of water in relation to the estimated cost of the water conservation project proposed. The District has specified a budget to partner with customers and the District intends to allocate these funds among a small number of proposed projects that, as a whole, will result in significant annual water savings.

If you are interested in participating in this conservation program, please submit a proposal that includes the following information:

1. Description of the water conservation project being proposed and how the project will result in reduced water use.
2. The annual amount of water that the proposed project will conserve.
3. The estimated cost of the entire water conservation project.

The District will reimburse the winning customers a portion of the cost of the project after the project has been completed. The amount of funds that the District will provide for selected projects will depend on the number of projects selected, the nature of the project, the cost of the project, and the amount of water that will be conserved. The District anticipates that it will provide funds to cover approximately 10%-25% of the total cost of the projects selected.

Proposed projects that are applicable to a wide range of the District's customers are encouraged. The District may use proposals submitted for funding as models for District water conservation projects in the future.

Submit your water conservation project proposal for consideration to:

**Purissima Hills Water District
Attn: Water Conservation
26375 Fremont Road
Los Altos Hills, CA 94022**

Proposals will be accepted through May 31, 2010.

Please call the District Office at 650-948-1217 if you have any questions.
