

PURISSIMA PIPELINE

And the Winners Are...

In the February 2010 Pipeline, we announced our *Water Conservation Program* and asked customers to submit a proposal for a residential project that would result in reduced water use. The District would reimburse the winning customers a portion of the cost of the project at completion. Three proposals were submitted and the Board decided to award funding to all three.

Congratulations to the Coughrans on Roble Veneno and the Ivesters on Finn Lane! The third project was submitted by Steve Schmidt who proposed a conservation software program that will be linked to the District's website. We will let our customers know when the program is available.

Thank you for your participation and earnest effort to conserve water!

District Elections

There will be two open seats on the District's Board of Directors this November. Gary Waldeck has decided not to run for a second term but will instead run for a seat on the Los Altos Hills City Council. Incumbent Bob Anderson has indicated that he will run again.

Candidates who wish to run for the office of Director must be a resident of the Purissima Hills Water District and a registered voter. Candidate packets are available from the Registrar of Voters in San Jose and Declarations of Candidacy must be filed by August 6th, 2010. Please call the District office at 650-948-1217 for additional information.

Water Running Down the Street?

Many times, main breaks and customer leaks have been discovered by someone jogging, walking, or driving by an unusual amount of water in the street. Please call our office 24/7 at 650-948-1217 to report any excessive water. Your call may help us discover a main break earlier; if it is a customer leak, we can notify the homeowner. In either case, it is the neighborly thing to do! ☺

Fall Landscape Classes

The Bay Area Water Supply and Conservation Agency (BAWSCA) is offering 25 **FREE** landscape classes between August 5th and October 30th. **Registration is required!**

Topics include:

- ◆ Composting for Healthy Soil & Water Efficiency
- ◆ No Fuss Landscape Beautification
- ◆ Water-Efficient Drip Irrigation
- ◆ Lawn Removal, Alternatives, and Management
- ◆ Creating the Illusion of a Lush Garden
- ◆ Water Conserving Techniques in the Garden

The full list of classes can be found at www.bawasca.org. Call BAWSCA at 650-349-3000 or email landscape@bawasca.org to reserve your space today!
